nano-VISION PENHOLDER

DE 203 12 398 U1

With large capacity refill / Mit Großraummine / Avec recharge grande capacité.

The *nano-VISION* penholder is filled with 2 liquids, a transparent oil and a black ferrofluid which contains magnetic nano-parts of the size of about 10 nanometers*. By putting the pen into the holder, the black liquid moves upwards and creates interesting prickles.

Der *nano-VISION* Stifthalter ist befüllt mit zwei Flüssigkeiten, einer klaren Lösung und einem schwarzen Ferrofluid, das magnetische Nanopartikel in der Größe von ca. 10 Nanometern* enthält. Beim Einführen des Kugelschreibers steigt die schwarze Flüssigkeit nach oben und bildet einzigartige Stacheln.

Le support de stylo *nano-VISION* est rempli de 2 liquides: une huile transparente et un fluide noir ferreux contenant des particules magnétiques de la taille de 10 Nanomètres*. En introduisant le stylo dans le support, le fluide noir se fige et crée des formes surprenantes.

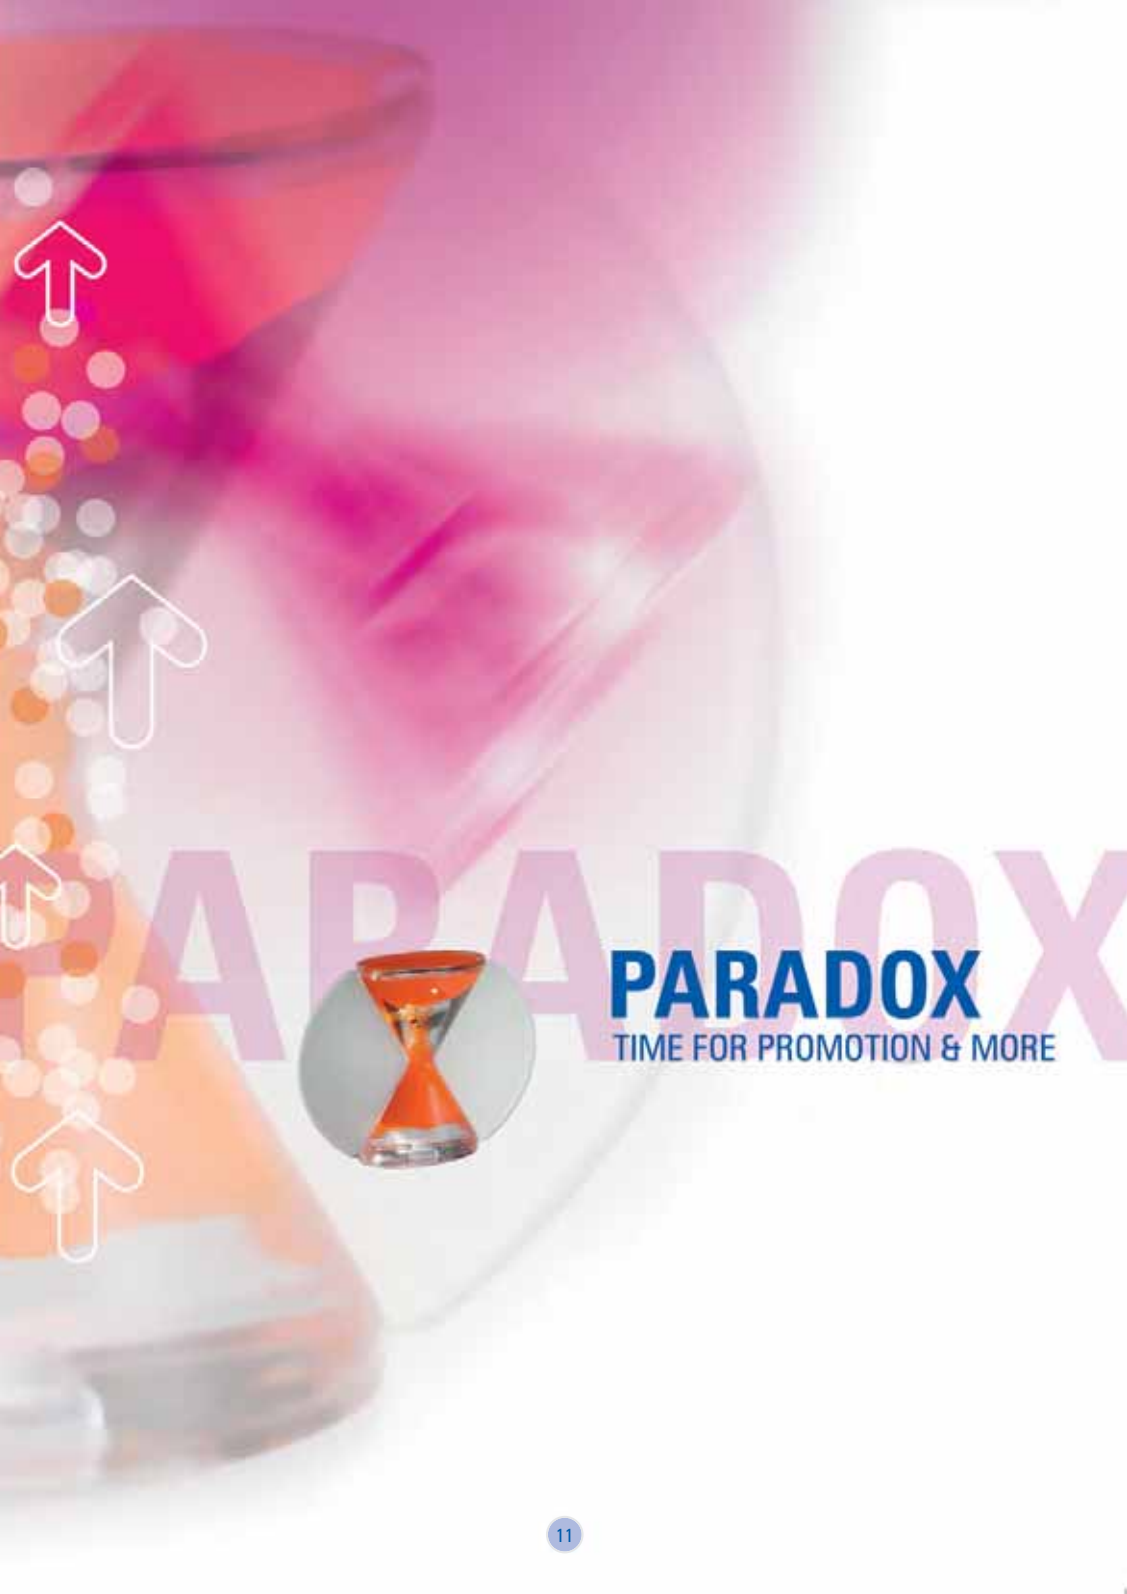

*1 Nanometer = 0,000001 Millimeter

nano-VISION GLASS PROJECTS

Magnetic liquid – amazing effects

Now it is possible to fill glass objects with *nano-VISION* liquid. The example shows blown glass in heart and stomach shape, embedded in acrylic. Please consult for individual projects.
